Introduction

This document represents a functional annex to the University of Iowa Emergency Operations Plan (EOP) and is maintained by the Department of Emergency Management (DEM), Campus Safety. It provides procedural guidance for any changes in campus operational status due to severe weather, including reducing operations, class cancellations, delayed opening and/or early termination of services. Most often, this procedure will be implemented for winter weather event impacts, but may also be used for any hazardous or severe weather that threatens normal operations such as flooding, extreme temperatures, and other potentially dangerous conditions that could impact university operations.

The University of Iowa (UI or university) will operate in accordance with the university academic and master calendars except when overriding public safety concerns otherwise require operational adjustments to be made.

As a matter of policy, the University of Iowa is never closed. The residential, healthcare, research, and overall public safety aspects of UI operations make this a necessity.

Purpose

To enable a consistent, transparent, efficient, and coordinated multi-department and multi-campus response to applicable inclement weather.

Scope

This plan applies to the UI-Johnson County campuses in coordination with all other UI campuses. UI campuses located outside of Johnson County will follow each of their own campus policies and procedures for inclement weather decision making in coordination with the Provost. University of Iowa Health Care (UIHC) will be included in the coordination through the routine emergency management structure and coordination but will follow UIHC policies and plans regarding inclement weather.

This plan addresses roles and responsibilities, provides definitions, and outlines campus procedures.

In cases where the UI Emergency Operations Center (EOC) is activated due to severe weather, UI will follow the incident management structure and process as outlined in the EOP.

Authority

The authority to make extreme weather operational decisions on behalf of the university has been delegated by the University President to the Executive Vice President and Provost (Provost). The
Provost may consult with various resources, including but not limited to, members of the Severe Weather Advisory Group (SWAG), as applicable. For current conditions and other real-time updates, the Provost may confer with campus partners such as Campus Safety, Landscape Services, and CAMBUS as needed to make an informed decision.

**Limitations**

The University of Iowa will endeavor to make every reasonable effort to respond to forecasted severe storms and/or hazardous weather incidents. However, there is no guarantee implied by this document that a perfect response will be practical or possible.

**Operational Decisions**

Inclement weather often develops overnight and can change rapidly. In such cases and depending on conditions, attempts are made to distribute a campus announcement and notify media by 5:30 a.m. before the start of the day. If inclement weather or an emergency develops during any other time of the day, the same notification procedures are followed and an announcement will be made as soon as reasonably possible.

When inclement weather or emergency conditions are such that a reduction in operations needs to occur two or more days in succession, the procedure is followed each day, including weekends. Unless there is an announced operational change for a particular day, the university is open and operating on a regular schedule. Because conditions can change unexpectedly overnight, an evening announcement usually will not be made for the next day, except in rare situations.

Even when the university is operating normally, there could be unsafe travel conditions in the area. Students and employees should exercise caution and gather as much information as possible about weather and road conditions before they decide whether to travel during periods of inclement weather.

During deteriorating weather conditions, it should be assumed that university-wide operations will continue unless an official announcement is made via Hawk Alert in conjunction with the Office of Strategic Communication. For special events, individuals are encouraged to check with event sponsors and/or applicable webpages. Those who travel to or from campus should use their judgment as to whether such travel is wise. Employees should refer to the UI Operations Manual for additional information regarding leave and other Human Resources related topics.

Coordination and approval are necessary if an organization/department/unit wants to alter building access or adjust building hours of operation during a time when inclement/hazardous weather is forecasted. The requesting entity must submit a request as soon as reasonably possible with applicable information to DPS-OEM@uiowa.com and receive approval prior to implementing any access changes. DEM will coordinate with the Provost and applicable members.
of SWAG to evaluate potential risks associated to the requested actions. Consultation with the requesting entity’s vice president level leader, as applicable, may also occur if a denial of the request is being considered. The final decision, as determined by the Provost, will be communicated to the original requestor.

In the event of inclement weather or an emergency, the university follows set procedures for announcing university-wide operational changes by making a formal announcement.

Most, but not all, inclement weather announcements will be made in response to the declaration of a Wind Chill or a Snow/Ice Emergency.

- **Wind Chill Emergency**
  Conditions: When existing or predicted low temperatures and wind conditions have the potential to pose a severe health threat to those walking to and from class or work assignment, a Wind Chill Emergency may be declared based on forecast or actual temperatures. This may occur when the sustained wind chill is less than or equal to -30 degrees Fahrenheit and/or the time for frostbite to occur is less than 10 minutes. These conditions also may include a NWS Wind Chill Warning.

- **Snow/Ice Emergency**
  Conditions: When snow or ice accumulation is predicted or occurs, significantly impacting roads and sidewalks on campus, a snow/ice emergency may be declared if the impact rises to the level that safe travel is no longer possible and poses a significant public safety threat.

When UI reduces operations to include essential operations only, employees involved in critical functions should report to work, as applicable. Unless otherwise determined by a specific department’s Business Continuity Plan, critical functions are those that relate directly to the health, safety, and welfare of the university, ensure continuity of key operations, and maintain and protect university property.

When an announcement is made to reduce campus operations, the campus community should refer to [emergency.uiowa.edu](http://emergency.uiowa.edu) and/or departmental webpages for information regarding specific operations updates or events.

1. **Special Events** — Departments and units hosting special events should make their own prior arrangements with employees and participants, notifying them how to proceed in case of inclement weather or an emergency. In unique circumstances, where the safety of the participants and employees is not jeopardized, special events, such as ticketed concerts or athletic events open to the public, may be held upon approval from applicable university leadership. In these situations, departments and units must ensure adequate services through coordination with Facilities Management, Campus Safety, and other units expected to support such operations and then submit their request via email to the UI Department of Emergency Management (DEM) via [DPS-OEM@uiowa.edu](mailto:DPS-OEM@uiowa.edu) or following other provided
instructions. DEM will coordinate with the Provost and/or the applicable Vice President of the applicable requestor to determine approval.

2. **Transportation** — When the decision is made to reduce UI operations for inclement weather conditions, CAMBUS may continue to provide on-campus transit services beyond that time as road and weather conditions allow. The ability to operate in a safe manner will be the primary consideration when determining whether service can be provided. Notifications regarding operational changes will be made available through CAMBUS official means of communication, including but not limited to, applicable apps and webpages.

3. **Dining Services** — The university residential dining commons will provide meal plan service even when the university closes for inclement weather. However, the department may delay opening and/or may opt to close early if weather conditions impact operational capabilities. Meal plan participants will be notified by email of any changes in daily operations. Up-to-date information will also be provided via their webpage or other designated methods of official communication.

4. **Other Campuses** — Announcements for weather related operational impacts at UI campuses outside of Johnson County are disseminated by those campus administrators separately from the main campus announcements.

### Severe Weather Advisory Group (SWAG)

SWAG is a group whose membership is representative of the university administrative structure responsible for certain essential/critical campus operations. See Annex A for members and their contact information.

In their role within SWAG, these individuals report to the Provost for the purpose of serving in an advisory capacity regarding severe weather impacts and response capabilities. SWAG is coordinated through DEM.

**Responsibilities**

- SWAG will assess the nature, the severity, and the anticipated impacts and recovery of the university due to the potential inclement weather and advise the Provost of its findings. The Provost will make the decision to cancel classes and, if necessary, to reduce operations, as applicable.
- SWAG will implement the decision and take appropriate actions.

**Advisory Process**

1. **Key Actions**
   - Monitor weather threat
   - Communicate weather forecast, current conditions, and potential impacts
   - Maintain coordination throughout the event
   - Provide information to senior leadership
   - Document event and applicable operations
2. Procedures
   A. Activation
      • Upon determination of a threat of inclement weather that has the potential to significantly disrupt the normal course of business and/or poses a significant threat to the health and safety of the campus community, the Provost may authorize the activation of SWAG. DEM may activate some or all of the group, based on the direction of the Provost, and request members to provide situation reports pertinent to their areas.
         i. Any member of SWAG may contact DEM and recommend activation of the group. The decision to activate will be made by the Provost.
      • At the direction of the Provost, DEM will create initial briefing messages and either schedule a conference call or direct other means of coordination.
         o SWAG members will be notified via email and/or text message.
   B. Coordination Activities
      • When using a conference call, Annex B should be used to document the call.
      • For operational change discussions, the Provost may use Annex C to aid in the decision-making process although the results of this form shall not override the ability of UI leadership to use caution and independent judgment in determining the operational status of the university.
   C. Craft applicable operation change message using template.
      • Campus Safety Communications and External Relations, Office of Strategic Communication, DEM, Office of the Provost Communications, UI External Relations
      • Submit for approval to Provost (or designee)
   D. Communicate applicable operational changes:

<table>
<thead>
<tr>
<th>Communication Task</th>
<th>Assigned To</th>
</tr>
</thead>
<tbody>
<tr>
<td>When possible, provide advance notice to president, cabinet, collegiate deans and identified associate deans/leaders</td>
<td>Office of the Provost</td>
</tr>
<tr>
<td>Issue Hawk Alert</td>
<td>Campus Safety</td>
</tr>
<tr>
<td>Social media dissemination</td>
<td>Campus Safety and OSC</td>
</tr>
<tr>
<td>Share messaging with campus communicators</td>
<td>Campus Safety (lead coordination), OSC and Office of the Provost</td>
</tr>
<tr>
<td>Post situation updates to Emergency page</td>
<td>Campus Safety</td>
</tr>
</tbody>
</table>
E. Continue to gather information.
   • Campus Safety will continue to monitor the weather threat and impacts.
   • Updates in between calls may be shared via email or other designated means.
   • DEM will facilitate additional coordination efforts as needed.

F. Event Close-Out
   • Unless specific announcements, extending cancellations, and/or operational changes are made, classes will resume the next regularly scheduled class day and the university will resume normal operations at the beginning of the next morning shift or regular business day.

G. After Action Review (AAR)
   • Events will be reviewed as necessary. Extent and type of review will be determined based on the impacts of the event.
   • After action items will be solicited and should be submitted via email to DPS-OEM@uiowa.edu or as otherwise directed.
   • DEM will compile AAR items into a document which may be distributed via email or as otherwise determined appropriate.

Factors to Consider
   • The inherent unpredictability of the weather makes it impossible to definitively dictate a time for certain procedures to take place.
   • A more expansive storm/situation may require several pre-event conference calls and/or may result in an EOC activation.
   • Special consideration should be given to decisions made after the start of the workday. This represents a logistical challenge especially as it pertains to Parking and Transportation.
   • Consideration should also be given to the city streets adjoining the university, as city street conditions may prohibit CAMBUS from passing on their normal routes.
   • Consideration may be given to weather in outlying areas where significant populations of faculty, staff, and/or students may be commuting from.
   • The decision worksheet (Annex C) can be used to help further aid in the decision-making process. This document includes additional criteria and factors that should be considered with an attributable value system to support the process. The decision worksheet in no way shall limit the ability of leadership to use good judgement and extreme caution.

SWAG Coordination

Overview

Upon receipt of an applicable advisory, watch, warning or otherwise indicated by DEM, the Director of DEM (or designee) will inform the Provost. The Provost may opt to request activation of all or
specific members of the Severe Weather Advisory Group (SWAG) via conference call or Veoci. The purpose of the coordination may be to:

- Gather information pertaining to impacts and potential recovery capabilities.
- Maintain situational awareness.

Generally speaking, the first coordination meeting (virtual, via phone, etc) for an event will likely commence at least 12 hours ahead of the forecasted start of the event. However, these times are subject to change based on the path and timing of the weather event.

Coordination of information is key to effective and appropriate decision making. Again, the University of Iowa Hospitals and Clinics coordinates with their Incident Management Team (IMT) as it relates to their medical emergency support function. Coordination with UIHC to ensure collaboration and consistent communications will occur through routine coordination in emergency management and UI leadership roles. This also includes any operational impacts or concerns that need to be coordinated based on an institutional response up until any appropriate/further activations occurs.

The following shall be used as a reference for suggested information to be shared by the applicable group/area:

<table>
<thead>
<tr>
<th>Group/Area</th>
<th>Focus</th>
</tr>
</thead>
</table>
| Emergency Management                                 | • Weather briefing  
• Local impacts and updates  
• UIHC status (hospital operations, clinic operations, and event declaration/staffing)  
• Johnson County and State of Iowa status  
• DOT travel status |
| Facilities Management                                | • Roads and grounds conditions  
• FM Staffing  
• Loss of critical services  
• Expected time for clearing  
• Operational considerations |
| Campus Safety/Police                                 | • Roads and grounds conditions  
• Emergency responder staffing  
• Building access  
• Operational considerations  
• NITE RIDE status |
| Business Services (including Parking and Transportation) | • Purchasing needs and approvals  
• Receiving operations  
• P&T reported road and grounds conditions  
• CAMBUS schedule/status  
• Parking lot status |
**Incident Management Software**

UI will use an incident management system software tool, currently Veoci, that will allow for ongoing virtual situational awareness and information sharing as well as accountability/tracking of resources and documentation, as it applies to coordination for extreme weather situations. DEM may activate a room for the forecasted extreme weather so that all SWAG members can share related concerns, information, and assessments.

**Conference Call Procedure**

In the absence of Veoci or if the need arises that a conference call is better suited, the call will be announced via email and/or text messaging to the applicable members of SWAG, including backups. Those unable to join the call are encouraged to share updates with DEM to be shared with the group. As applicable, DEM may provide situation reports (SitRep) via email between calls, as appropriate. Therefore, members of the SWAG are encouraged to share updates with DEM between conference calls, for situational awareness purposes.

The Department of Emergency Management (DEM) will initiate the call and open the line approximately 5 minutes prior to the scheduled time of the call. Participants will be polled for attendance and then the DEM facilitator will poll each office/department and ask for an update.

</tbody>
</table>
At the conclusion of the departmental reports, there will be time allotted for questions and other commentary.

Conference calls should be facilitated and documented by DEM personnel and should follow the subsequent agenda:

1. DEM will begin the call with a roll call and a weather briefing.
2. DEM will then solicit applicable information.
3. Discuss additional concerns and ensure appropriate information is available for decision making needs and any applicable communications.
4. Operating schedule recommendation.
5. Schedule next call time.
